

Great Talk

Prof. Dr. Me Ofcourse

Institute for Psychology, University of Tromsø, Norway

17.2.2016

**UNIVERSITETET
I TROMSØ** UiT

- the stuff after output in the preamble is so that the atom-package markdown-preview-enhanced also works properly
- all the rest is specified in the latex-templates and the Makefile

Slide 1

- Bullett point

Slide 1

- Bullett point
- pause on slide

Centering stuff

I redefined the `>` symbol to result in a center-environment can be used with images, too

citations

work ([Open Science Collaboration et al. 2015](#)) in case you use pandoc-citeproc

Pictures

Pictures without captions

Use a backslash after the picture

So that you don't get a caption. (two empty lines after)

Paused bullet points

- ❶ number one

Paused bullet points

- ❶ number one
- ❷ and two

Paused bullet points

- ❶ number one
- ❷ and two
- works with normal ones

Paused bullet points

- ❶ number one
- ❷ and two
- works with normal ones
- as well

Paused bullet points

- ❶ number one
- ❷ and two
- works with normal ones
- as well
-

slide without title

Latex slide

- markdown
- does
- not work here

multi-column slide in markdown

found this in

<https://github.com/jgm/pandoc/issues/1710>

- this
- **has**
 - full markdown support!

multi-columns using the new markdown-syntax
